

# Zone 2D Enterprise Software

Law enforcement agencies today are under huge pressure to do more with less. FARO® Zone 2D Enterprise Software saves time and eliminates the errors made using hand-drawn crash diagrams and/or outdated diagramming software. It produces 2D crash report diagrams that can be easily integrated into an agency's standard reports.

Ideal for large agencies, Zone 2D Enterprise is reliable, affordable and easy to deploy.

Officers can create 2D crash report diagrams in as little as **FIVE MINUTES.**

## Why Use FARO Zone 2D Enterprise Software?

### ACCURACY ENSURED

Start with an aerial map of the crash location or snap road components together to quickly represent any street, intersection or roundabout.

### SAVE TIME

Choose from a library of pre-drawn icons — including vehicles, trees, animals, signs, lights, traffic control items and more — to quickly recreate your scene. These icons can be resized, rotated and have their color changed as desired.

### DOCUMENT THE DETAILS

Add your own notes, photographs, measurements, buildings and other details to the scene.

### IT'S EASY TO LEARN

Anyone with basic computer use capability will have no trouble learning how to use Zone 2D Enterprise.

### TRAINING AND PROCESS CUSTOMIZATION

You can access training videos at any time to learn on the go. Plus, agencies can customize in-program training materials so that the software fits their exact workflow.

## What is unique about Zone 2D Enterprise?

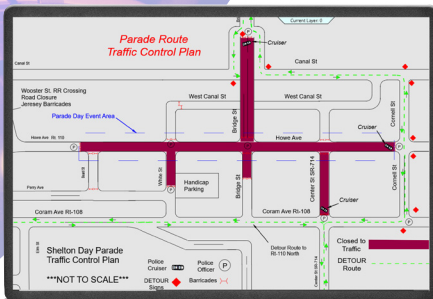

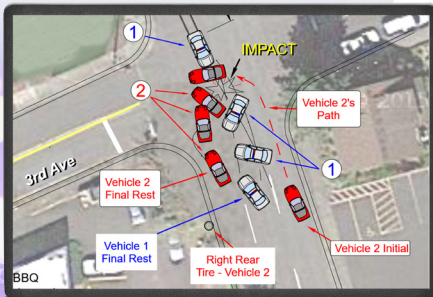

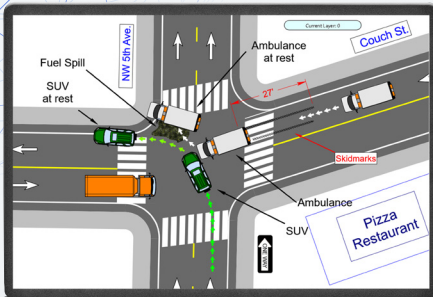

FARO has provided excellent crash diagramming software to large police departments and public safety agencies for more than 25 years. Experts will work closely with your agency to integrate Zone 2D Enterprise into your workflow to produce accurate crash reports quickly.

- FARO Enterprise customers are paired with a direct contact on the FARO Zone software development team to ensure the success of their integration and deployment.
- Diagrams can automatically be saved to a variety of image formats (.pdf, .jpg, .tif, or .png), depending on what is compatible with your crash reports.
- Zone 2D Enterprise is configured to automatically save the diagram to the desired format, image size, file name and file location so it perfectly integrates with the report.
- Extensive training is provided for the agency's Help Desk and trainers — including a customized "FARO Assist," which is an onboard training resource that helps end users succeed.

Take advantage of FARO's enterprise-level solution to make your agency's crash diagramming process more efficient and cost effective.

## Affordable, Convenient and Easy to Deploy for Large Agencies

Zone 2D Enterprise is easy for everyone in the organization to use without any license keys. With competitive pricing based on how many copies are being used in your department — something that can be adjusted annually — there's no question about what platform will be best suited for your agency's crash diagramming solution.

Contact FARO today to learn how your agency can start creating better crash report diagrams faster. Go to [FARO.com](https://www.faro.com) to learn more.
